

How To Trace Your Knife For Sizing

Trace your knife in order to estimate the measurements. Please lay your knife as depicted in the picture and trace an outline. Measure and write the actual measurements on the trace.

To estimate the width place your knife on its top and trace along both sides of the knife as depicted in the picture. Measure and write the actual measurements on the trace.

** After performing the traces of your knife you can either scan (**PDF format**) and email to rob@rmbcl.com or drop it in the mail to me at 966 Bay Dr. Oakboro, NC 28129.

** I understand this is slightly inconvenient however this is essential to making sure you get the sheath you want. This will avoid most mistakes in sizing your sheath.
